

VIREX SETUP {#SETUP-ON-LINUX}

??? info "bash commands"

```
```bash
linenums="1" hl_lines="1 5 8"
1. CLONING
git clone https://github.com/Soham-Metha/virex.git
cd virex/

2. BUILD (sudo)
./install.sh

3. RUN VIREX (in the sample programs DIR)
cd ./examples/SASM/
virex
```
```

1. Clone this repo

2. Build the project (requires **sudo**)

3. Run VIREX

??? question "UI doesn't render properly"

If the **TUI doesn't render properly**, try adjusting your **terminal font size**.

If that doesn't help, you can tweak layout values in **src/VM/vm_tui.c::CreateWindows()**.

The constants used are defined as **percentages** of the screen dimensions.

P.S. **kitty terminal** config, and font used, are available in **/tools**

Execute Sample Programs {#EXECUTION-ON-LINUX}

1. Setup and Execute Virex (In the Sample Programs DIR)

2. Select "Run SASM/ORIN command with custom flags"

- Enter the following command:

```
-i helloWorld.sasm -I ./ -o tmp.sm
```

 use **Arrow keys** for navigation in menu.

- Select **"SASM build and exec"** by pressing **'a'**
- Enter the output filename (**tmp.sm**)

1. Activate the syntax highlighter in VS Code

- Open VS Code
- Press `Ctrl + Shift + P`
- Type: `Preferences: Color Theme`
- Select: `Palenight+sasm`

 Open any `.sasm` file in vs code to see the syntax highlighter at work!
