Active Maintainers/Creators
!!! warning ""

The project is maintained by two core developers who each own a unique layer of the system.

=== "Soham Metha"

{ width="120px"

style="border-radius: 50%;padding: 4px;" }

- > **Role**: Lead Developer

- > **Modules Owned**: VIREX VM, SASM Assembler, VS Code Extension, Docs

!!! tip "info"

- Designed the **VIREX** Virtual Machine architecture.
- Developed the **SASM Assembler** and complete instruction set.
- Built tooling: AST visualizer, debug tools, and VS Code syntax extension.
 - Authored all core documentation.
 - Maintains the monorepo, versioning, and long-term roadmap.

```
!!! quote

*"VIREX is a hands-on way to explore systems programming, not just
study it."* <br>

{ width="120px" style="border-radius: 50%;" }

```
> **Role**: Compiler Engineer - ORIN <br>
> **Modules Owned**: ORIN Compiler (WIP), Custom Hashtable
Implementation
!!! tip "info"
    - Designing and implementing **ORIN**, the high-level language
compiler targeting SASM
    - Handles the full compilation pipeline: parsing, IR generation, and
SASM output
    - Exploring advanced features like expression optimization and
static analysis
!!! quote
    > *"ORIN aims to make high-level programming compatible with low-
level control."*

Acknowledgments

We gratefully acknowledge the creators and communities that inspired and supported this project:

• Educational Inspiration:

Tsoding, Dr. Jonas Birch, Low Byte Productions, Cobb Coding for their deep dives into compilers, virtual machines, and systems programming.

Ecosystem & Tools:

The open-source communities around the JVM, and language tooling landscape, for providing extensible blueprints and motivation.

Early Support:

Friends, testers, and curious peers who gave feedback during the early stages of development.

VIREX is open. Hackable. Minimal. Built for builders.
